NEXORA INDUSTRIES

Invoice Processing and Payment Terms

Document ID: NX-FIN-001 | Version: 2.5 | Effective date: 1 January 2026 | Status: Current
Owner: Head of Accounts Payable | Classification: Internal
Nexora Industries is a fictional company. This synthetic document was created for a portfolio demonstration and does not describe a real organisation.

1. Invoice submission

Suppliers send their invoices as PDF files to the central Accounts Payable mailbox, or through the e-invoicing platform. Each invoice must show a valid Nexora purchase order number, the supplier's VAT number and the delivery or service period. Invoices without a valid PO number are returned to the supplier within 5 business days. Invoices for utilities and statutory fees, which do not require a purchase order, are the only exception: they must show the contract or account reference instead.

2. Matching rules

- Goods: three-way match between the purchase order, the goods receipt and the invoice.
- Services: two-way match between the purchase order and the invoice, plus a service entry sheet approved by the requester.
- Price differences follow the tolerance and price block rules of NX-PUR-005. When the invoiced quantity is higher than the quantity received, the invoice is blocked for quantity; the requester resolves a missing goods receipt and the buyer resolves supplier errors.

3. Payment terms

- The standard payment term is 60 days net from the invoice date.
- Small and medium-sized suppliers, with annual revenue below €10 million, are paid 30 days net from the invoice date.
- Any other payment term requires the approval of the Category Manager and Treasury and must be written into the contract.
- An early payment discount offered by a supplier is accepted when it is at least 1% for payment within 10 days.

4. Payment runs

Payment runs take place twice a week, on Tuesday and Thursday. An urgent payment outside a payment run requires the approval of the Head of Accounts Payable.

5. Blocked invoices

Blocked invoices (price block, quantity block, missing goods receipt) are listed in a daily report. Invoices that remain blocked for more than 30 days are reviewed every week by Accounts Payable and Procurement Operations.

6. Duplicate invoice prevention

The ERP checks every invoice for duplicates on supplier, invoice number, invoice date and amount. Potential duplicates are held until Accounts Payable has reviewed them.

7. Supplier payment inquiries

Suppliers can check the status of their invoices in the supplier portal. Accounts Payable answers supplier payment inquiries within 3 business days.
